

SANKET KUMAR SAHU

Software Engineer | Java | Spring Boot | React.js | MERN | AI/LLM

Bangalore, Karnataka | +91 8260686787 | sanketsahu104@gmail.com

github.com/sankky07 | linkedin.com/in/sanket-kumar-sahu

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience developing Java, Spring Boot, REST APIs, and full-stack web applications using React.js, JavaScript, PostgreSQL, and MySQL. Experienced in backend development, secure authentication, enterprise workflow automation, and responsive web applications. Built an AI-powered code review platform integrating GitHub API with Google's Gemini API for automated code analysis and review reporting. Working knowledge of Python, Large Language Models (LLMs), prompt engineering, and Retrieval-Augmented Generation (RAG).

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, JSON, Responsive UI

Backend: Spring Boot, REST APIs, Hibernate/JPA, Node.js, Maven

Security: Spring Security, JWT, OAuth

Databases: PostgreSQL, MySQL

MERN: React.js, Node.js; familiarity with MongoDB and Express.js

AI/LLM: Gemini API, LLM Integration, Prompt Engineering, RAG Concepts, AI-Assisted Test Generation

Tools: Git, GitHub, Docker, Kubernetes, Linux, Postman, Jira, MobaXterm, Agile/Scrum

PROFESSIONAL EXPERIENCE

Comviva — Intern Engineer Trainee

Sep 2025 – Nov 2025

Bangalore, India

- Developed backend modules using Java, Spring Boot, and REST APIs for enterprise campaign processing and secure FTP workflows.
- Replaced Java "WatchService" with a configurable Timer Poller, improving FTP Proxy compatibility with Docker and Kubernetes deployments.
- Integrated NGAGE Studio and Jira APIs with AI-generated test cases to automate QA workflows and reduce manual test-case creation and verification.
- Built a Post Load Validation utility that automated dashboard metric calculation and pre/post data-load comparison, eliminating manual reconciliation.

PROJECTS

AI Code Review Assistant

Java | Spring Boot | React.js | PostgreSQL | Gemini API | GitHub API | REST APIs | JWT | OAuth

- Built a full-stack AI-powered code review platform using Java, Spring Boot, React.js, PostgreSQL, and Gemini API.
- Integrated GitHub API to connect repositories and generate automated AI-powered code review reports.
- Used LLM integration to identify bugs, code smells, security issues, and optimization opportunities in source code.
- Implemented secure GitHub OAuth authentication and JWT authorization using Spring Security.
- Designed REST APIs for repository management, review history, and user authentication.

Purelane — Shopify E-commerce Website

Shopify Liquid | JavaScript | CSS | JSON | Git

- Delivered a live, client-commissioned Shopify e-commerce storefront as a paid freelance project.
- Developed reusable sections for product grids, bundles, combos, customer reviews, and custom product cards.
- Customized product pages, variants, cart functionality, collection pages, and on-site search.
- Implemented responsive UI/UX across desktop and mobile using custom templates, sections, snippets, and assets.

EDUCATION

Institute of Technical Education & Research (SOA University)

2022 – 2026

B.Tech, Computer Science Engineering | Bhubaneswar, Odisha | CGPA: 7.07
